S I R:

Applicants and their counsel have carefully reviewed the Final Action dated June 5, 2003, but believe the claims in their present form are patentable over the references relied upon by the Examiner. The following arguments in support of patentability were presented and discussed in an interview with the Examiner, at which the Examiner supervisor, Mr. Glenn Dawson also was present, on August 5, 2003. It was agreed at the interview that the claims in their present form are distinguishable over the references currently relied upon by the Examiner, however, the Examiner stated an updated Search would be necessary upon the submission of a formal response.
